THE LINK BETWEEN HYPERTENSION AND STROKE

Over 20% of UK adults have hypertension

Hypertension increases the risk of developing other health conditions.

Hypertension puts blood vessels under constant stress and damages the artery walls, making them weaker. This makes it more likely to develop clots due to poor blood flow. It can also damage arteries to the point of bursting or tearing, which can lead to internal bleeding.

Our easy to use home medical device range

UA-611 UPPER ARM BLOOD PRESSURE MONITOR

- One button control - with latest 3rd generation fully automatic measurement technology
